---

The City of Galion Water Department is dedicated to protecting public health. We are also dedicated to supplying continuous water service to all of our customers. However, there are events, such as water main breaks and infrastructure improvements, which may occur without warning and may cause the water supply to be interrupted.

The City of Galion understands that some of our customers have medical issues that may require a continuous supply of water. We would like to be able to contact these customers in an event of an interruption of water service.

If you or someone in your household has such a medical condition, please contact the Water Treatment Plant at (419) 468-1393 so we can add you to our critical users list. Written documentation of critical user status **will be required** from your health care professional. Documentation can be obtained by calling the Water Treatment Plant. Completed forms must be submitted to [dougbeugly@galion.city](mailto:dougbeugly@galion.city), faxed to 419-462-1638, or mailed to:

City of Galion
