Combined fire and domestic services greater than 4", where permitted, will be charged 100% of the capacity charge for the domestic portion of use and 50% of the capacity charge for the fire line portion of use. The fire line size required will be certified by the engineer that designs the fire system and reviewed by the City Engineer.

The fire line capacity charges may be paid either (1) by making a one-time, lump sum payment in advance for the total charge, or (2) by making a continuous and permanent monthly fire service connection charge, which monthly charge shall be determined by dividing the total fire capacity charge by 240 and shall be added to and billed at the same time as the monthly water bill. The customer must make this election prior to the installation of the fire service line and agree in writing to abide by this election thereafter and so long as water service is available to such location.

Out-of-town contract area capacity charges are 1 ½ times the in-town capacity charge. The City does not perform taps outside the corporation limits.

A Street Tear-up Fee is also required when applicable. If a bore under the street is required then there will be an additional \$400 charge to the Tap Fee to cover the City's cost to install.
