

### STREET TREE CULTIVAR RECOMMENDATIONS

The following tree cultivars are recommended for planting in tree lawn or downtown planting sites where stress from compaction, pedestrian abuse, pollution, etc. has previously troubled other types of trees. The trees listed below have been used successfully in many communities. However, please remember that the success of any tree planting depends upon the individual planting site, as well as the tree.

For specific information about any of the trees for your particular planting site, please contact the Division of Forestry or a member of the Ohio Nurserymen's Association.

\*\*\*Please note that any trees planted require a tree planting permit through the Building and Zoning Department. There is no cost for the permit. \*\*\*
